The Cedro Building Remodel is now COMPLETE!

This project included new furnishings, lighting, paint, restroom and elevator updates, as well as all new flooring throughout the building. The building has received a newly redesigned lobby and new seating spaces have been installed on both floors. In addition, each classroom space has been updated with new technology, glass dry-erase boards, and furnishings. Training videos and how-to videos on the new AV equipment for the classrooms (to include lighting dimmers to be used by faculty, TV screens, and projectors) will be forthcoming along with detailed instructions on the EVC Administrative Services webpage. Please look for these videos, detailed instructions, and trainings to be held by CTSS once we are back on campus.

Installation of new glass dry-erase boards in classrooms

Installation of glass boards has begun in several classrooms on campus, replacing older dry erase boards that are damaged or stained. These glass boards provide an updated, modern look while providing a sustainable writable surface that cleans easily, won’t stain, and will last much longer than traditional dry erase boards.

Installation of plexiglass social distance barriers

Work station social distance barriers are currently being installed in areas that were requested by supervisors and managers in fall 2020. These plexiglass guards will be mounted to existing office furniture, providing a safety barrier between staff and those who they are assisting. These guards, as well as other COVID-19 campus safety measures, will help to provide a safe working space for office staff.

In addition to these workspace barriers, installation of social distance guards at high-traffic service desks on campus are anticipated to begin February 2021.
Installation of Wellness Stations on EVC Campus

Wellness Stations have now been installed in each building on the EVC campus. These stations are all ADA accessible and are equipped with hand sanitizer and paper towels. EVC Custodial staff will check and restock the stations daily as needed.
