

# **EVERGREEN VALLEY COLLEGE**

**DUAL ENROLLMENT FOR  
HIGH SCHOOL STUDENTS  
COURSE LIST 2022- 2024**

# EVC Recommended Dual Enrollment Courses

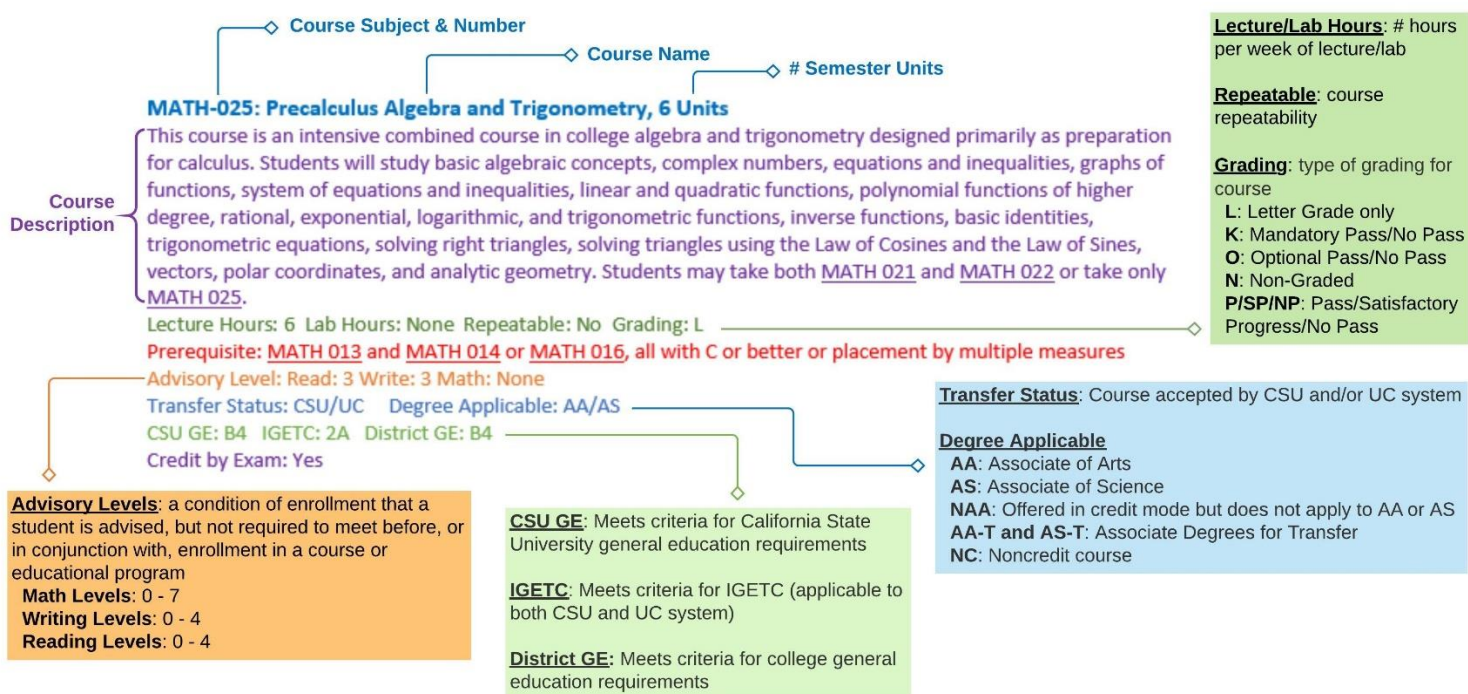

High School students may enroll in college courses in order to:

1. Earn high school A-G requirements and college credit at the same time
2. Train for a career while in high school
3. Graduate high school early
4. Earn a college certificate or degree during high school
5. Learn about various careers
6. Take college classes at no cost

High school students enrolled in college classes are exempt from tuition costs and are eligible to enroll in up to 11 units each fall or spring semester, and 7 units in the summer semester, per California state legislation. Dual enrollment students are bound by the information contained in the [college catalog](#) in the same way that all other college students are bound – it is like a contract.

This list of courses has been specifically selected by faculty and staff to support the success of dual enrollment students. The classes listed below tend to have no prerequisites and are transferable to four-year universities. Here is how to read the list of courses:

**ETH-042: Asian Pacific American Culture and Experience, 3 Units**

This course covers (1) the Asian backgrounds, migration, ethnic culture (particularly major religious beliefs, philosophical thoughts, value system, customs, and traditions), and American experiences APAs as a whole have in common; (2) unique aspects of each Asian American co-group, with more emphasis on the six largest groups: Chinese, Filipino, Indian, Vietnamese, Korean, and Japanese Americans. Also of special importance are key concepts, theories, and perspectives pertinent to this study, as well as American experiences APAs share with other U.S. racial groups, especially African American and Latino Americans. This course is a combination of the Humanities and Social Sciences.

**Translation and Interpretation**: Leads to a Certificate of Achievement and direct employment as a translator

**SPAN-031: Introduction to Translation and Interpreting, 4 Units**

This course will cover the historical origins, theories, techniques, and practices of translating and interpreting. Students will focus on comprehension of source language texts and accurate expression of content and style in translations. Theoretical readings will be used to familiarize students with strategies, techniques, and challenges faced in the translation process.

Lecture Hours: 4 Lab Hours: None Repeatable: No Grading: L

Recommended: Native fluency in Spanish (or equivalent). Student must see instructor prior to enrollment.

**SPAN-035: Sight Translation, 3 Units**

This course will introduce students to the fundamental skill of sight translation. Students will learn how to comply with the legal equivalence requirements of this mode of interpretation. There will be emphasis on reviewing the necessary reading comprehension skills, acquiring the ability to analyze text upon first reading, acquiring vocabulary research skills, expanding vocabulary and understanding the role of the interpreter. Students will practice paraphrasing, chunking, prediction and expanding and condensing exercises to finally develop the skills necessary for performing sight translation of complex texts.

### **SPAN-036A: Consecutive Interpretation I, 3 Units**

This course will introduce students to consecutive legal interpretation. Students will learn how to comply with the legal equivalence requirements of consecutive interpretation. They will also be introduced to the proper usage of this mode of interpretation at various settings. There will be a focus on memory building skills as well as note-taking techniques. Students will begin to develop their own notetaking system and symbols. Through guided exercises students will continue to build vocabulary and learn how to deal with various factors encountered when using the consecutive mode of interpretation.

### **SPAN-036B: Consecutive Interpretation II, 3 Units**

This course builds on the skills acquired in Consecutive Interpretation I. Students will continue to enhance retention while developing personal note-taking systems in more demanding situations with lengthier messages. There will be an emphasis on complying with the legal equivalence requirement and limiting omissions. Students will learn how to deal with challenges to interpretation and make corrections on the record. Students will acquire terminology related to complex criminal proceedings, administrative hearings and varied medical settings.

## Business Pathways

**Bookkeeping and Accounting:** Leads to a Certificate of Achievement in Accounting and employment as a bookkeeper

### **ACCTG-101: Bookkeeping for Small Business, 3 Units**

This course is an introduction to accounting principles and procedures that apply to the operations of a small business. The material is presented through lecture and simulation activities including online computer activities. Transactions are analyzed and processed, financial statements are developed, and records are adjusted and closed for a complete accounting cycle for service and merchandising businesses. This course helps to prepare students for positions as accounting assistants or entry level bookkeepers. Course management software will be used to enhance learning.

## Dual Enrollment Pathway Courses

### Industrial Technologies and Transportation Pathways

**Automotive Technologies:** Leads to Certificate of Achievements and AS degrees, and careers in the automotive industry

#### **AUTO-117: Automotive Principles, 1.5 Units**

This is an introductory course for prospective automotive majors. Students will become familiar with automobile ownership, consumer maintenance, terminology, tools, procedures, and a basic overview of major vehicle systems.

#### **AUTO-102: Automotive Systems, 3.5 Units**

This course will introduce students to the automotive industry and provide a basic overview of the eight areas of certification as specified by the National Institute for Automotive Service Excellence (ASE) and the National Automotive Technicians Education Foundation (NATEF). The course will examine the purpose, function, and operation of the major systems common to most automobiles. In addition, students will learn methodologies for inspecting and providing basic maintenance common to most vehicles. Students will work with the tools and equipment used for inspection, maintenance, repair, and diagnostic work. (C-ID AUTO 110X)

#### **AUTO-119: Introduction to Engine Performance, 2.5 Units**

This course is part of the Automotive Basic Skills track emphasizing engine systems relevant to performance and driveability. Classroom theory, engine analyzers and test equipment will be utilized to diagnose modern automobile engine systems. Engine diagnostic strategies will be performed in the lab as they would be in the workplace. In addition to gaining hands-on experience, successful students will build teamwork and cooperative skills, improve their time management practices, and develop sound workmanship values.

#### **AUTO-103: Light Line Technician, 2 Units**

This course will prepare students for entry level employment in the automotive field as a first-level maintenance technician. The course will also introduce students to the Express Service training that the American Honda Program provides. Each student is assigned various vehicles and performs routine maintenance, inspection, and basic performance testing tasks that are commonly performed at automobile dealerships. In addition to gaining hands-on experience, successful students will build teamwork and cooperative skills, improve their time management practices, and develop sound workmanship values.

### **AUTO-170: Electrical Systems, 3 Units**

This course introduces students and entry level automotive technicians to the automotive electrical system. The course covers DC electrical theory, magnetism, Ohm's law, series and parallel circuits, passive components, and system dynamics. Students learn to calculate and measure voltage, resistance and current in theoretical and live circuits, build and test working models of typical automotive electrical systems using table top components and industry specific simulators, and practice diagnosis and repair procedures on a variety of vehicles. Students will also develop an understanding of modern electrical test equipment, such as DMMs, GDMMs, and DSO's, and industry standard troubleshooting and repair procedures. This course will prepare students for the ASE A6, Automotive Electrical Systems, certification examination.

**BIM-124: Advanced Revit, 2 Units**

This course is focused specifically on providing an intermediate to advanced level of training on Revit Architecture. The skills presented during this class are for experienced Revit users and are designed to help experienced users take the next step in advancing their current knowledge of Revit Architecture. Students will create architectural visualization renderings, use filters, section boxes, design options and phasing to present various display ideas and solutions. They will also create advanced families, develop advanced schedules using project and shared parameters and conceptual massing.

**BIM-138: BIM Work Experience, 1-8 Units**

Occupational work experience is designed for students who work or volunteer in the field related to their career major. Students are required to provide evidence that they are enrolled in BIM course(s). Students can earn one unit of credit for each 60 hours of unpaid volunteer time or 75 hours of paid work during the semester. Students can repeat Career/Occupational Work Experience, combined with General Work Experience, or alone, up to a maximum of 16 units. Internship/job placement is not guaranteed.

## Art and Media Pathways

**Art:** Leads to AS degree and careers in photography, illustration, 2- and 3-dimensional art, and architecture

### **ART-091: Survey of Art History: Prehistoric Through Gothic, 3 Units**

This course is an illustrated survey of Western Art History from the Prehistoric through the Gothic periods. Course content emphasizes painting, sculpture, and architecture from important centers of Western culture, and how art reflects historical, social, political, and religious attitudes of the time. Presentation of the material is through lecture with projected images. Comparative analysis of styles and artists with critical evaluation of aesthetics will be included. Topics include Prehistoric, Egyptian, Greek, Roman, Early Christian, Romanesque, Byzantine, Medieval, and Gothic Art. (C-ID ARTH 110)

## Dual Enrollment Summer Academies

### Environmental Science Academy

Learn about this exciting interdisciplinary field, which sits at the intersection between biology, soil science, geology, geography, meteorology, and other sciences. Includes lectures, hiking, sampling, observing, measuring, and other science stuff!

#### **ENVIR-010: Environmental Science, 4 Units**

This is an interdisciplinary course in which students examine the interaction between human societies and the environment. Students will study important physical and biological properties necessary for life on Earth. They will explore major issues that are bound to affect the future of humans on our planet including population growth, resource exploitation, pollution, climate change, and the loss of biodiversity. Students will also consider environmental policies and the prospects for a sustainable future. Field trips may be required. ENVIR-010 meets general education requirements for science with a lab and can be counted as either a life science or as a physical science course.
