

College Budget Committee FY25-26 Supplemental Allocation Recommendation

Purpose

The purpose of the College Budget Committee (CBC) is to be an advisory body to the College President on process, procedures, and development of the college budget. Specifically, the committee is charged to make recommendations to the College Council for the allocation of funding and/or budget reductions.

College Resource Request Process

Program Review cycle - 4 year cycle per Department (IEC to CBC)

Annual Resource Request - Yearly Department submittal if not submitting a Program Review (IEC to CBC)

Number of Submittals Reviewed in Spring 2025 for FY25-26

2 Program Reviews (PRs)

13 Annual Resource Allocations AURRs

15 Total

Budget Development

- Each Department within the Fund 10 will get a Base Allocation based on what they spent in FY24-25

\$1.4Million in expected Base Allocation funds to the College out of \$1.9Million total Discretionary

The Supplemental Allocation for FY25-26 will be based on discretionary allocations not increasing

from the District and budget constraints - \$285,000

| Expected Discretionary | \$1,900,000 |
|------------------------|---------------|
| Base Allocation | (\$1,400,000) |
| Fin Aid Match | (\$215,000) |
| CBC Supplemental Alloc | (\$285,000) |
| | |

\$0

CBC Notes and Considerations

- Due to budget constraints and the large amount of requests, the CBC could only consider the Manager's 1st priority and 2nd priority for the top 10 ranked departments.

| | \$652 065 |
|-------------|-----------|
| PRs total | \$62,014 |
| AURRs total | \$590,051 |

- AURRs and/or PRs that solely asked for Faculty and/or Classified personnel were not reviewed by CBC
- AURRs and/or PRs that requested Faculty and/or Classified personnel, were only reviewed if they requested a supplemental discretionary allocation and the personnel request were not considered by the CBC
- Only AURRs and/or PRs that were accepted by IEC were considered and reviewed by the CBC and those AURRs and PRs had to be:
 - a. On time
 - b. Fully completed
 - c. Manager Prioritization and sign off
- A list of AURRs and/or PRs that had Faculty position requests were forwarded to the VP of Academic Affairs and the Academic Senate President as the chairs of the Faculty Prioritization Committee on 4/25/25
- A list of AURRs and/or PRs that had Classified position requests were forwarded to the VP of Student Services and the Classified Senate President as the chairs of the Classified Prioritization Committee on 4/25/25
- AURRs and/or PRs that had Technology requests were forwarded to the College Technology Committee for compliance on new requests only technology requests were only considered for funding by the CBC if they were listed as the Manager's 1st priority due to budget constraints or the 2nd priority for those who ranked in the top 10 per the CBC.
- There were not any AURRs and/or PRs that needed to go to the Safety & Facilities as none were new and Managers were asked to submit their input through the Facilities Master Plan process taking place from Fall 2024 Summer 2025.
- The managers were asked throughout this process to prioritize their requests during the submittal process in November and December 2024 and again during the mission critical request from the CBC in March and April 2025
- The CBC and VP of Administrative Services worked with several managers throughout this process to get requested items onto other funding sources (Fund 17) in order to free up funds to allocate through the CBC Supplemental Allocation process
- Economics of scale were promoted and used when assessing requests that could go to other funding sources or be purchased in bulk to save resource
- CBC provided detailed feedback for each requested submittal regarding what they did well and ways to improve their request in order to get funding or get more funding on the next cycle (review pro and cons attachment)

College Budget Committee FY25 – 26 Supplemental Allocation Recommendation

Process & Timeline

| | | November 2024 - Submission of Program Review (PR) by those departments due to provide for that cycle December 2025 - Submission of Annual Resource Request (AURR) by departments seeking supplemental allocations for FY25-26 |
|-------------------------|---|---|
| Overview and Goals | } | February 12, 2025 – Introducing Schedule for completion, training/guidelines for ranking rubric, and amount allocating February 26, 2025 – AURRs released to the committee to begin completion of individual rubrics on TEAM |
| | | March 5, 2025 – CBC submits AURR rubrics to Business Office March 12, 2025 -Results of AURR discussed in CBC meeting and list of pros and cons made by CBC for AURR March 24, 2025 – VP Alexander sends email to Managers to list mission critical items per CBC request March 27, 2025 – First Batch PRs released to CBC on TEAMS for assessment |
| Step-by-Step Process | } | April 3, 2025 – CBC submits first batch of PRs to Business Office April 4, 2025 – Second Batch of PRs released to CBC on TEAMS for assessment April 9, 2025 – Results of PRs and AURRs discussed in CBC meeting and list of pros and cons made by CBC April 11, 2025 – CBC submits second batch of PRs to Business Office April 12, 2025 - VP Alexander sends email to Managers to list mission critical items per CBC for PRs April 21, 2025 – Final questions to Mangers for PR questions based on CBC request April 23, 2025 – Final recommendation and votes for supplemental allocation based on rubric, discussion, and amount to be allocated. |
| Recommendation | | April 28, 2025 - Recommendation to College Council as an Information Item to go to Action Item May 14, 2025 – CBC Final Meeting - Evaluation of Process and Discussion on updates needed |

College Budget Committee's AURRs and PRs Rubric Tally

Budget Committee Review Notes of Pros and Cons of AURRs and PRs March and April 2025 Meetings

AURR Review Notes March 2025

Astronomy

| Pros: | Good goals for hands-on approach, comprehensive measurements of SLOs, community connections with internships. |
|-------|---|
| Cons: | Be more specific on what is hands-on approach, didn't disclose what is needed for the spectrometer (piece of it, personnel need). No statement about any ongoing costs, and whether these costs were conditional upon needing a lab technician. |

Athletics

| Pros: | Better request than last year by mentioning specific courses where the funds will be used. |
|-------|--|
| Cons: | Not enough assessment results, no details, just a short answer. They mentioned they did not get funds last year, but they did (they were mistaken and referred to 2023 monies). Did not explain the source of funds, including Fund 10 monies. Did not list a goal for equity. |

Biology

| Pros: | Well written, Biology seems to go above and beyond. This could be used as an example for future |
|-------|---|
| Cons: | There should be a delineation between the different programs, specifically |
| | Biology, Health Science, and Natural Science. Vehicles cannot be given to an |
| | individual department, but instead a fleet assignment. |

Chemistry

| Pros: | The narrative mentioned a very pro-student program. They seemed to have used |
|-------|---|
| | their funds very well. SLO assessments were great, with three-year history |
| | included. |
| Cons: | No information about previous use of funds. The funding sources didn't match |
| | the totals. They got money last year, but didn't state that they did receive funds. |
| | They put a narrative about needing personnel. |

Drama

| Pros: | Very exciting and impressive narrative of Theater activities, all coming from one full-time faculty position. Commitments to Actions and department goals were great. |
|-------|--|
| Cons: | Asked for personnel, which drove their narrative. You can't ask for the discretionary funds and then not talk about the discretionary needs. The department seems to not be aware of alternative funding for the department. Student success rates were not disaggregated, not allowing for better assessment of the department's success. |

Engineering

| Pros: | Details about goals are provided. Curriculum updated with stackable certificates. Equity and Ed. Master Plan align. Explained in detail how their funds were spent from last year. |
|-------|--|
| Cons: | Generic strategic goals, with no specificity or examples. For example, professional development was a non-specific statement. |

English

| | ٠, |
|-----|--------|
| +‡+ | |
| | |

| Pros: | Provided success rates for 22/23 and 23/24 academic years. Outlined funding received from AB 928 and AB 1705. They had a summer academy for students last year. |
|-------|---|
| Cons: | Response to viability of program was listed as N/A. The SLO assessment was not complete for all courses. This could be due to the nature of their request. |

Health Science

| Pros: | Well written, Health Science seems to go above and beyond. This could be used |
|-------|---|
| | as an example for future applications. |
| Cons: | There should be a delineation between the different programs, specifically |
| | Biology, Health Science, and Natural Science. Vehicles cannot be given to an |
| | individual department, but instead a fleet assignment. |

Music

| Pros: | Monthly performances give students real performance experience. |
|-------|---|

3

| Cons: | Piano maintenance was tied to health and safety—how does this work? No |
|-------|---|
| | mention of how many students the program is serving. No mention that stated |
| | sections are concurrent sections. |

Natural Science

| Pros: | Well written, Natural Science seems to go above and beyond. This could be used as an example for future applications. |
|-------|---|
| Cons: | There should be a delineation between the different programs, specifically Biology, Health Science, and Natural Science. Vehicles cannot be given to an |
| | individual department, but instead a fleet assignment. |

Physics

| Pros: | Good job on background of department. They are a growing program, adding sections over the last few years, leading to more graduations in Physics. Their SLO summary explains a problem they are trying to address. |
|-------|---|
| Cons: | They did not provide three-year trend information. Asked for personnel, which drove their viability. You can't ask for the discretionary funds and then not talk about the discretionary needs. |

Tutoring Center

| Pros: | Provided good data with survey results, and success rates. This program is in sync with strategic enrollment management. Explained that their funding for NetTutor was altered after moving to a new division. |
|-------|--|
| Cons: | <u>Didn't</u> take the data to be specific to their goals. <u>Didn't</u> explain that the data created <u>can't</u> be proved to be directly connected to student success in the classroom. |

Visual Arts

| Pros: | Program viability was done well, explaining very specific needs. |
|-------|---|
| Cons: | Life models' costs are funded already. The safety issues stated (OSHA) do not |
| | exist as OSHA violations. |

College Budget Committee's AURRs and PRs Rubric Tally

Program Review Notes 9 April 2025

Library

| Pros: | Well written. Data driven. Good intro and overview, with good depth of details and how they align to the purpose of the library. | | | | | | | |
|-------|--|--|--|--|--|--|--|--|
| Cons: | Too many acronyms. | | | | | | | |

Nursing

| Pros: | Very informative and succinct. Impressed with their numbers and success rates. | | | | | | |
|-------|---|--|--|--|--|--|--|
| Cons: | Stated self-identified ethnic groups were not as clear as typically stated across | | | | | | |
| | the college. Perhaps the program could be more specific to the groups typical | | | | | | |
| | used by the college/district to identify dis-proportional impact. They did not | | | | | | |
| | state how they used previous funds from this committee over past years. | | | | | | |
